

Part Number : DM164130-4 - PICkit 44-Pin Demo Board (PIC18F45K20)

---

This is a small demo board with a PIC18F45K20 device on board and a small, surface-mount prototype area. Use it with a PICkit 3 In-Circuit Debugger to program your code via a 6-pin ICSP header on the board. This product also includes two bare PCB boards for those interested in customizing their development. This 44-Pin Demo Board also comes bundled with the PICkit 3 Debug Express if you order the DV164131.

Part Number : DM320412 - 32-Bit Accessory Development Starter Kit for Android™

---

The Microchip PIC32 Accessory Development Starter Kit for Android™ is used for evaluating and developing accessories for Google's Android operating system for smartphones and tablets. It consists of the PIC32 USB Starter Kit, the Starter Kit I/O Expansion Board, and software libraries and APP, available via free download.
